

HOW DOES IT WORK?

Mazco Safe-T-Stopper[®] is specifically designed to allow for open gut or no-blo service tee stopping or tee removal without hazardous release of natural gas.

Simply mount the tool over the tee, remove the cap or plug, set an expandable plug below the branch & remove the tool. It is that simple!

Service tee connections can be put back in service or removed without the hazardous release of gas. Safe-T-Stopper[®] can also be used to change out faulty full port valves.

Capabilities:

The 3/4" to 1 1/4" Safe-T-Stopper[®] attaches to:

- 3/4", 1" and 1 1/4" homemade open gut pipe type service tees
- 3/4", 1" and 1 1/4" Mueller no-blo service tees with brass completion plug intact
- 3/4", 1", 1 1/4", 1 1/2" and 2" pipe threads
- 3/4" Mueller no-blo with brass completion plug missing

The 1 1/2" to 2" Safe-T-Stopper[®] attaches to:

- 1 1/2" and 2" homemade open gut pipe type service tees
- 1" and 1 1/4" Mueller no-blo service tees with brass completion plug missing.
- Attaches to 3/4", 1", 1 1/4", 1 1/2" and 2" pipe threads
- 3/4", 1" and 1 1/4" Mueller no-blo service tees with brass completion plug intact

Safe-T-Stopper[®]

Remove service tees in
10 to 15 minutes without
release of gas

Advanced tooling technology
for service tee removal

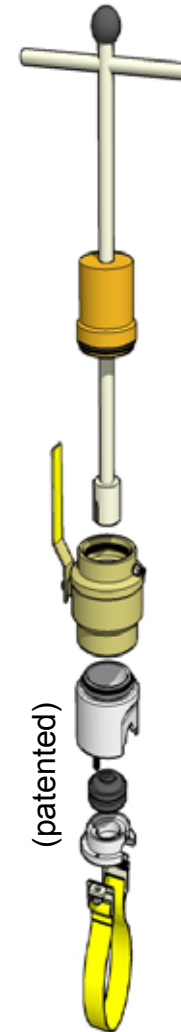

**Safety and Benefits
you can count on:**

Worker Safety

Save Money

**Environmentally
Friendly**

Easy to use

Safety and Benefits that you can count on:

Worker Safety

- Workers no longer need to be exposed to a hazardous gas rich environment.
- Safe-T-Stopper[®] is a closed tool system.

Save Money

- Reduce excavation size.
- Stop or remove a service tee instead of interrupting the main.
- No welder required in certain capping options.
- Reduced contractor / labour costs.

Environmental Friendly

- No more planned releases of natural gas to the environment.
- Reduce your GHG emissions.
- Reduce permitting.
- Enhance your public image.

Ease of use

- One worker operation.
- Stopping takes only minutes.
- Only one 9/16" wrench is required.

The Mazco Safe-T-Stopper[®] is a premium service tool which enables you to safely remove service tee connections without the need to shut down the main gas line.

Your company will be able to safely remove or replace service tees in 10 to 15 minutes.

There are literally millions of service tees and compression fittings in the ground that will eventually require attention. Service line stopping and service tee upgrades are done safely and efficiently with the Mazco Safe-T-Stopper[®].

Easily fits in a tool box

Easy to use - All Sizes
